

Module Specification

Module Title: Specialist Study 2

Module code:	HMMSHR0021	NQF level:	Level 7
Credit value:	40 credits	Trimester of study:	2
Applicable to:	PG Diploma Creative Musician and MMus Creative Musician	Pre-requisites:	Specialist Study 1 and Creative Practice in Context 1 (or 60 ECTS equivalent credits from a course in a relevant subject area)

Module overview

This module enables students to consolidate and develop their skills, acquired through Specialist Study 1, as they work towards achieving greater knowledge and understanding of professional practices, whilst continuing to build the technical proficiency and creative fluidity of their creative practice. Students will work towards the submission of a performance or portfolio depending on their chosen discipline.

In preparation for a performance or public sharing, or portfolio submission, students will, on a co-investigative basis with tutors in 1:1 sessions and in taught group sessions, work towards enhancing and refining their practical, creative and presentational skills, through identifying and resolving technical weaknesses, exploring and analysing a range of original material and /or repertoire, and developing a coherent mode of presentation in line with the demands of their chosen idiom.

Aims

1. To build on work undertaken during Specialist Study 1, to further develop technical proficiency in one or more of the following areas: composition, performance, production.
2. To build on work undertaken during Specialist Study 1, to further develop aesthetic/stylistic awareness in one or more of the following areas: composition, performance, production.
3. To build on work undertaken during Specialist Study 1, to further develop presentation/communicative skills in one or more of the following areas: composition, performance, production.

Learning outcomes

On successful completion of this module, students will be able to:

1. Apply further developed technical and presentational skills for submission of a production or composition portfolio, or public performance/sharing of existing (repertoire) or originally-composed/produced music.
2. Present evidence of the continuing development of an original musical language.
3. Employ advanced technical command and musicianship for the realisation of an effective submission.
4. Accept accountability for the co-ordination of human and physical resources, and for all aspects of time management in relation to submission quality.

Learning and teaching methods

Students will be assigned a specialist tutor in support of developing their skills, who will encourage technical development, and analytical and critical thought pertinent to the student's chosen direction. The tutor will also assist in building the student's awareness and understanding of applied practice (e.g. to act as a producer for a band or artist, to compose to commission for concert, film or television, to perform as a soloist or as part of an ensemble). In work in progress workshops towards the mid-point of trimester 2, postgraduate students will continue to critique their own work and that of their peers.

Contact hours and directed study (over Trimester 2)

Type	Length	Frequency	Total
Specialist Tutorial	1 hour	10 sessions	10 hours
Group Sessions	2 hour	10 sessions	20 hours
Directed study			370 hours
Total hours (100 hrs per 10 credits)			400 hours

Opportunities for formative feedback

Students do not receive written or grade-based formative assessment; practical and academic work is reviewed at tutorials.

Assessment Method (one of the following dependent on the student's chosen discipline):

Description of assessment	Length/Duration	Weighting	Module LOs addressed
A public performance of an existing work	20 minutes	100%	1, 2, 3, 4
A public performance or sharing of original compositions	20 minutes	100%	
A portfolio of original compositions/production work evidenced by appropriate documentation, i.e. scores, recordings, etc.	20 minutes	100%	

In advance of the abovementioned submissions, all students will submit an Assessment Proposal Form no later than two weeks prior to the end of trimester 1 or by the advertised date on the VLE. The form, which will not be formally assessed, will summarise (in no more than 500 words) their specific involvement in the proposed submission/performance, stating whether they would like to be assessed as a performer, composer, producer or combination (see Programme Specification Part 1), i.e. as studio producer, electronic music composer, combined producer-composer, recording artist-composer, etc. These details will be provided on the same form as that for Creative Practice in Context 2.

Re-Assessment Method* (one of the following dependent on the student's chosen discipline):

Description of assessment	Length/Duration	Weighting	Module LOs addressed
A public performance of an existing work	20 minutes	100%	1, 2, 3, 4
A public performance or sharing of original compositions	20 minutes	100%	
A portfolio of original compositions/production work evidenced by appropriate documentation, i.e. scores, recordings, etc.	20 minutes	100%	

* Submissions reflect the work done by students during the module; as such they are typically based upon lived experiences and often collaborative projects that require immersion in the work for a specific number of hours. In a practical sense, it is typically impossible for such engagement to be repeated; re-sits tend to focus on a re-evaluation or modification of the work with reference to constructive feedback provided by assessors. Alternatively, within the parameters of the assessment criteria, students might choose to submit entirely new work.

Indicative Reading List

The breadth of the indicative bibliography is significant due to each student's individualised programme of study. Specific recommended reading and repertoire will be provided by Specialist Study tutors to accommodate each student's intended direction.
